

## SLIDING GATE

The unloading of material on your roof must be done safely. Whether with a forklift or a lifting jib, there are risks. Having an unloading area equipped with a sliding gate can make this operation faster and much safer.

### FEATURES

- 100% non-penetrating
- Maximum opening of 10' (3 m)
- Ergonomic handle located inside the guardrail
- Compliance report available
- 10-year warranty
- Made in Canada
- Complies with the standards of the National Building Code (NBC)

Can be adapted to your need or integrated into a project. Contact us for more information!

## SWING GATE

The swing gate is ideal for separating two work areas or creating an unloading area on a roof or mezzanine.

### FEATURES
